New Academic Standards of Progress (SAP) Policy

Each semester/term you receive financial aid, you will be required to complete 67% of the units for which you receive federal, state and institutional financial aid funds. In addition, you must earn a grade point average of at least 2.0 (undergraduates) or 3.0 (graduates). Any student, who, at the end of the academic year, fails to maintain SAP, will be disqualified and will be ineligible to receive financial aid, including student loans. The one year grace period has been eliminated by the federal government.

Private Alternative Loans

The Office of Financial Aid requires the student to submit a FAFSA to determine eligibility for the lower-cost federal loans before certifying any private alternative loans.

General Unit Requirement

The Office of Financial Aid monitors the courses in which you are enrolled. When the disbursement of your financial aid occurs, only those units applicable to your degree will be considered part of your unit requirement.

Permission to Release Information

Attention students: if someone other than you calls to ask questions regarding your financial aid, we cannot disclose any information to them unless we have a Permission to Release Information form from you stating that you waive your right to privacy. This form is specific to the Office of Financial Aid and is not the same form that is used by other offices.
