January 2016
Seminar in Spain!

The curriculum of this program focuses on:

- History & Culture of Spain
- Education in Spain
- Introduction to selected aspects of art and history

The program is designed to be academically rigorous and trans-disciplinary, and employs methods that include traditional classroom teaching, lively and engaged discussions among participants, tours and site visits, and selected readings.

Spain is an extraordinarily diverse and historically complex and fascinating country. Among much else, students will be interested to learn more about Spain’s early history, the 700 year of al-Andalus (7th-15th cc), its Golden Age, its Imperial Age, its Civil War (1936-39), its period under Franco (1939-1975), its transition to democracy, and its accession into the European Union. In some ways, Spain can be seen as the country in Europe that has gone through the greatest changes!
