- Microsoft Visio 2007
- Microsoft Project 2007
- VLC media player
- Windows Media Player 11
- QuickTime Player
- Real Player
- Flash Player
- Shockwave Player

If you need assistance, contact the Service Desk at x 4130, located next to the Mailroom in Central Services.
**Desktop Computer and Projector**

1) Turn on the projector.
   Light will blink while starting up.
   Note: If you turn off the projector while it was running, it will take a minute to turn on again.

2) Turn on the computer.

3) Press PC Button to view on projector.

**DVD/VHS with Projector On**

1) Press VCR/DVD Button to view video on the projector screen.

2) Turn on VCR/DVD player.

3) Depending on the video player select to play the VCR or DVD.
   Note: Certain DVD copies may not play in the player, if so, try to play the DVD in the computer. Then press PC Button to view on projector.

**Laptop with Projector**

1) Hook up Laptop with wiring on top of podium.

2) Press Laptop Button to view on projector.

**ADDITIONAL PANEL CONTROLS**
Depending on the Projector’s Features

- **AV Mute** button will darken the projector image and silence the audio while you work on your computer. The button lights red when turned on.

- **Freeze** button will freeze the projector image. The button lights red when turned on.

- **Audio Mute** button will silence the audio. The button lights red when turned on.

- **Volume** knob must be turned slowly. Volume level is visualized with green lights. A red light means it is too high. Make sure the audio is not muted when turning up the volume.

- **Black Screen** button will darken the projector image while you work on your computer. The button lights red when turned on.

Please turn the **Projector** off, shut down the **Computer**, and turn off the **VCR/DVD** when you are finished.

Thank You
