When click on the “Banner Forms (Internet Native Banner)” under “Banner Test” or “Banner Development”. You need to follow these installation instructions in order to successfully login to your Banner Environment:

**Right Click on the “This website wants to install the following add-on: Java™ SE Runtime Environment “ message.**

![Image of Internet Explorer showing security warning]

**Click on “install ActiveX Control”.**

![Image of Internet Explorer showing security warning]

**Click on Install.**
Deselect the “Install the Yahoo! Toolbar” then click “Next”

Click “Close”

After you click “Close” a New Window will pop up.
Select “Always trust content from this publisher”. Then click “Run”.

The program will run and the “Oracle Developer Form” will successfully appear.

Login to Banner using your valid Banner Credential.
